At Indesco, Inc. you will often see the word's **@ Can...** The **@ Can...** at Indesco, Inc. is an attitude and commitment in recognizing that individual businesses have specialized needs. Indesco and the **@ Can...** Engineering, Sales and Management staff, are committed to offering a diverse range of Custom Designed Automated Machinery and Custom Electronic Controls. Our goal is to partner and establish with our customers long-term relationships that create quality solutions.

#### The **@ Can...** For Your Industry

For manufacturers whose process involves parts handling and any size assembly or sub-assembly, Indesco, Inc. can offer valuable automation technology. The industries we serve range from Appliance to Automotive and all types of small products and hard-goods for electrical and electronics. We provide general automation for Mechanical or Electro-Mechanical assembly, as well as systems for industries with specialized processes.

#### The **@ Can...** For Mechanical Systems

Indesco will design and build Mechanical and Specialized Machinery Systems to your needs. Each system is custom-designed and built to your requirements for the specific assembly process. System Components from new designs to selected existing solutions are properly integrated and their quality and high degree of craftsmanship assures precise and reliable performance in these disciplines.

#### The **@ Can...** For Robotics

Robotic transfer arms are integrated for more complex, intricate operations. Joining processes such as multiple welds and the application of coatings and adhesives are common examples of their functions. All are programmable and selected for their proven dependability and ease of operation. Joining and fastening equipment for the methods you use - from welding, driving screws and rivets to adhesive bonding can be incorporated.

#### The **@ Can...** For Indexing

Rotary and linear index systems are configured and integrated to move your work-pieces smoothly and reliably from station to station. Parts loading and unloading equipment can be provided as part of the production line or for specific stages of the assembly process.

#### The **@ Can...** For Synchronous Systems, Rotary and Linear

We design and build a configuration that keeps your work-pieces moving, from station to station. It's a well crafted component with assured performance, and just part of the whole system integrity that makes Indesco automation a sound and reliable decision for your company.

#### The **@ Can...** Diagnostics

Indesco can design Custom Electronic Systems with sophisticated diagnostics that assist your machine operators and maintenance technicians with the operation of the equipment. We have also utilized special software packages that include such features as Statistical Process Control (SPC), Event Detectors, Data Logger, Reporting, Trending Network, Alarming, Scripting, Systems Integration and Statistical Analysis.

# INDESCO INC.

- Custom Automated Machinery
- Material Handling Machinery
- Robotics
- Pick & Place Modules
- Rotary and Linear Indexing systems
- De-Stackers and Palletizers
- Finishing Machinery
- Typical Functional Testers
- Robotic Mig Welding
- Headrest Steamers
- Ovens
- Tow Line
- Synchronous Systems
- Transfer Equipment
- Custom Electronic Controls & Panels
- PLC and PC Based Programming
- Reconditioned Specialized Manufacturing Machinery
- Project and Process Management
- Specialist in Machine Tool Re-building and Systems Management Packages
- Glass Clip Machine
- Mechanical Fixtures
- Poka Yoke Machine
- Pneumatic
